CCNA PRACTICE LABS

# 7 Before-and-After Site Comparisons

Real screenshots of the practice-lab website, captured before and after completing each lab. The comparisons show the actual topology, task progress, and simulator interface.

**7**
labs photographed

**14**
actual site screenshots

**100%**
tasks completed in after views

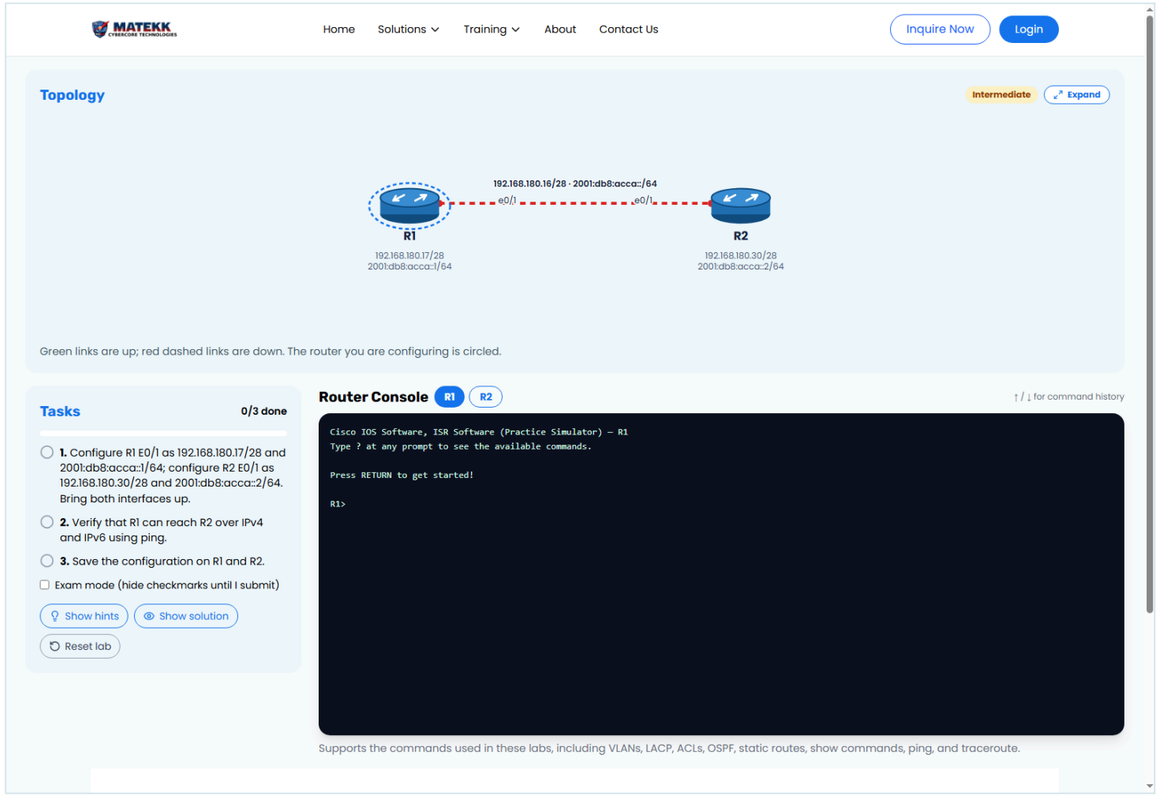

Labs documented: IPv4/IPv6 addressing, /26 and /125 point-to-point, VLANs, access and LACP trunking, ACL filtering, static/default routing, and OSPF DR election. Lab 5 is the previously hidden dual-stack lab; Labs 6-11 are the six new scenarios.

Screenshots are from the rendered practice site; after views show every lab task completed.

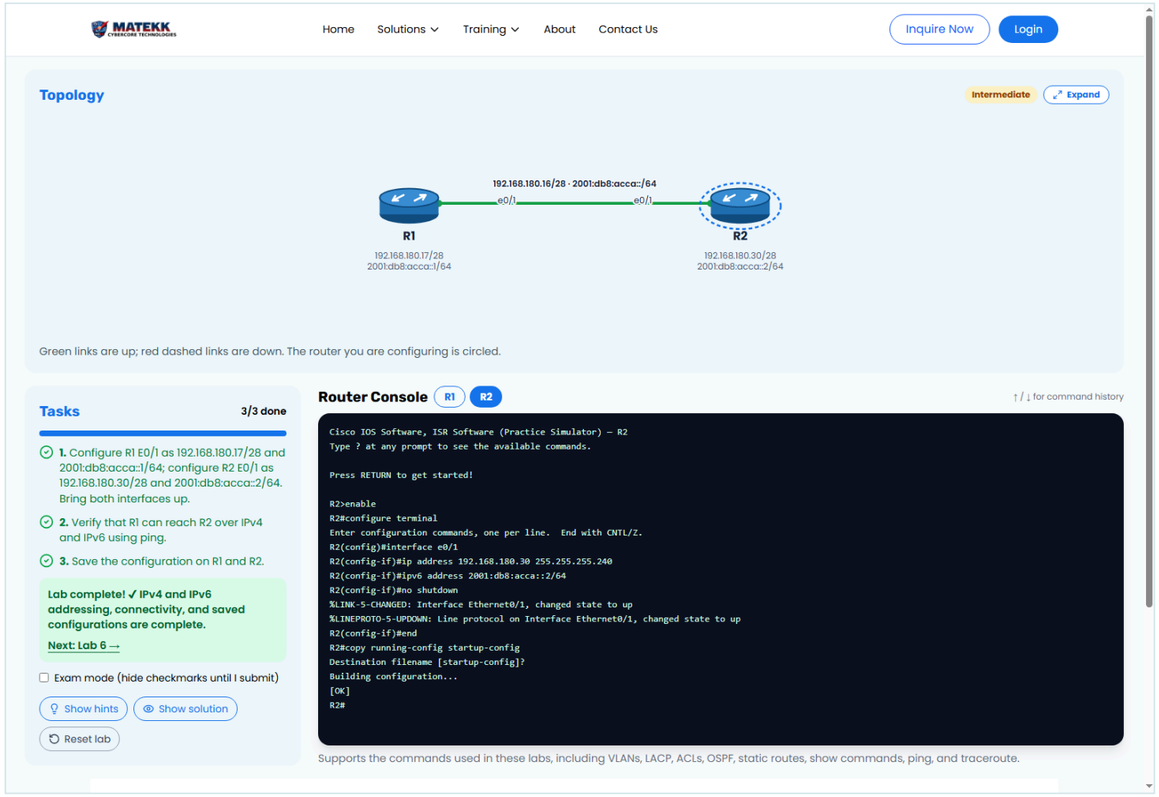

# Lab 5 | IPv4 and IPv6 Router Connectivity

## BEFORE | LAB NOT YET CONFIGURED

Initial topology and 0% task progress

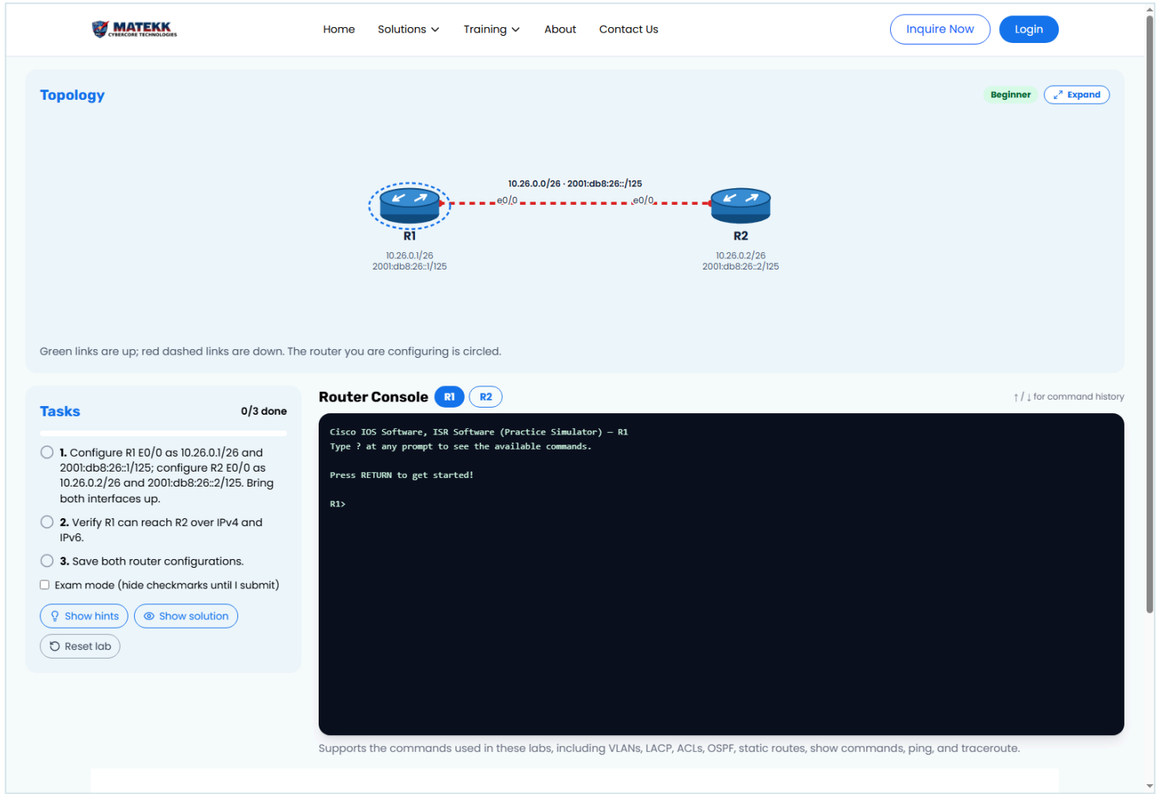

## AFTER | LAB COMPLETED ON THE SITE

Completed topology, terminal work, and green task checks

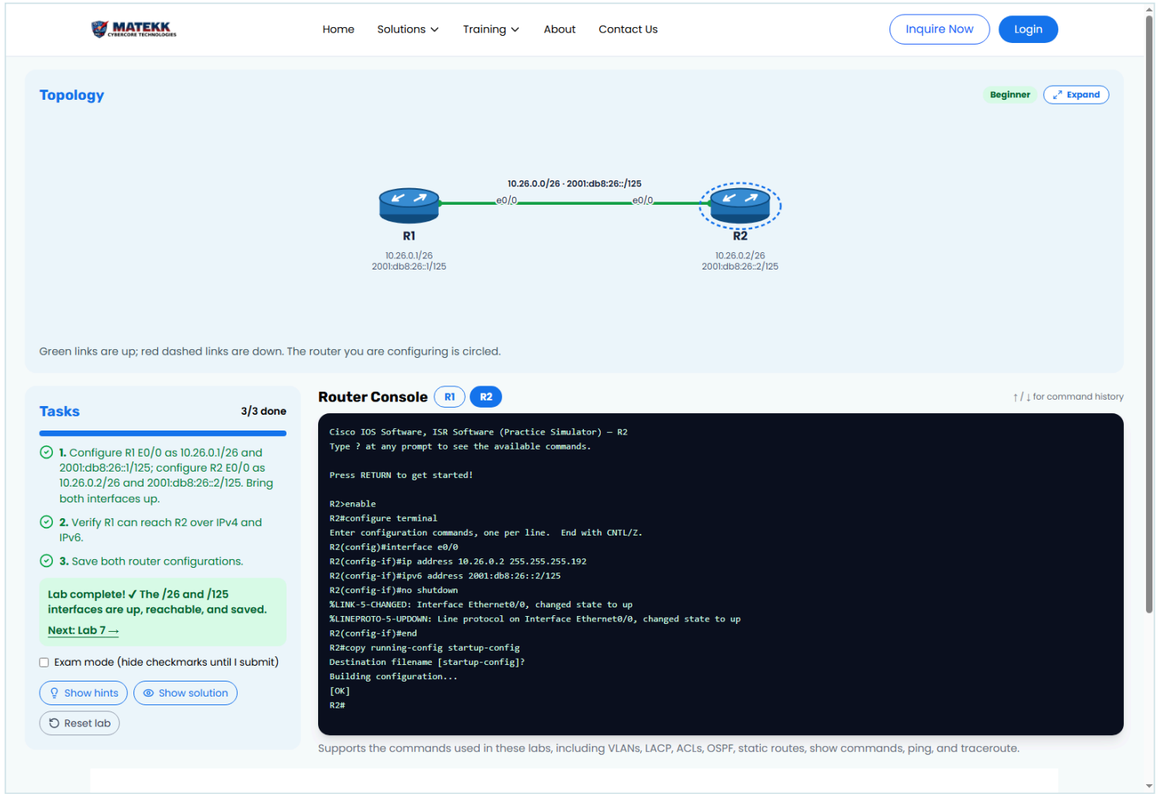

# Lab 6 | IPv4 /26 and IPv6 /125 Point-to-Point

## BEFORE | LAB NOT YET CONFIGURED

Initial topology and 0% task progress

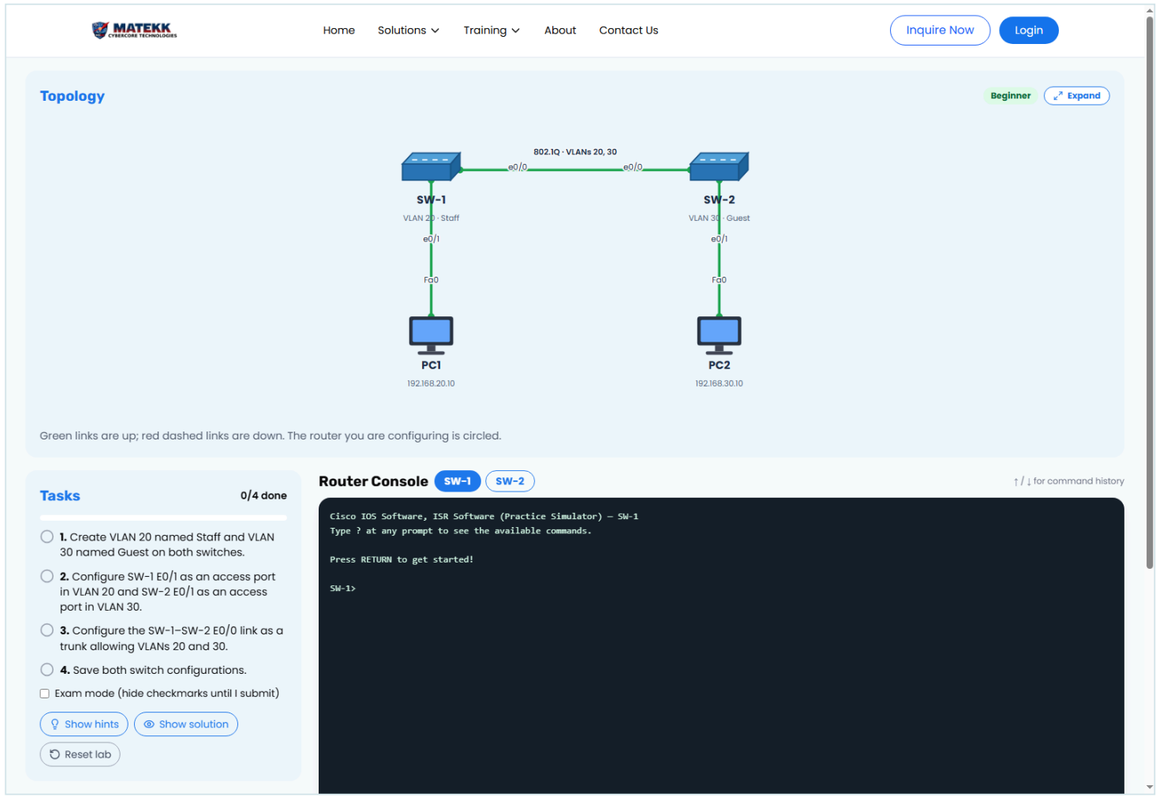

## AFTER | LAB COMPLETED ON THE SITE

Completed topology, terminal work, and green task checks

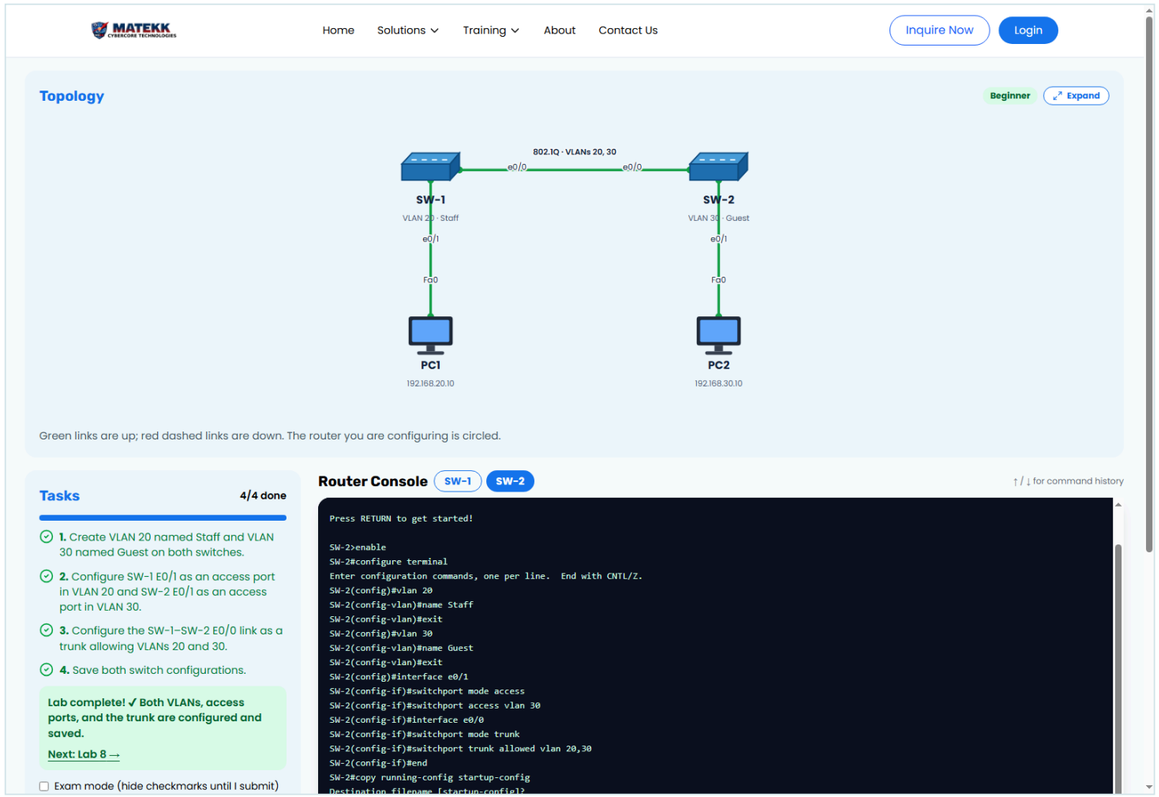

# Lab 7 | VLANs and Access Port Membership

## BEFORE | LAB NOT YET CONFIGURED

Initial topology and 0% task progress

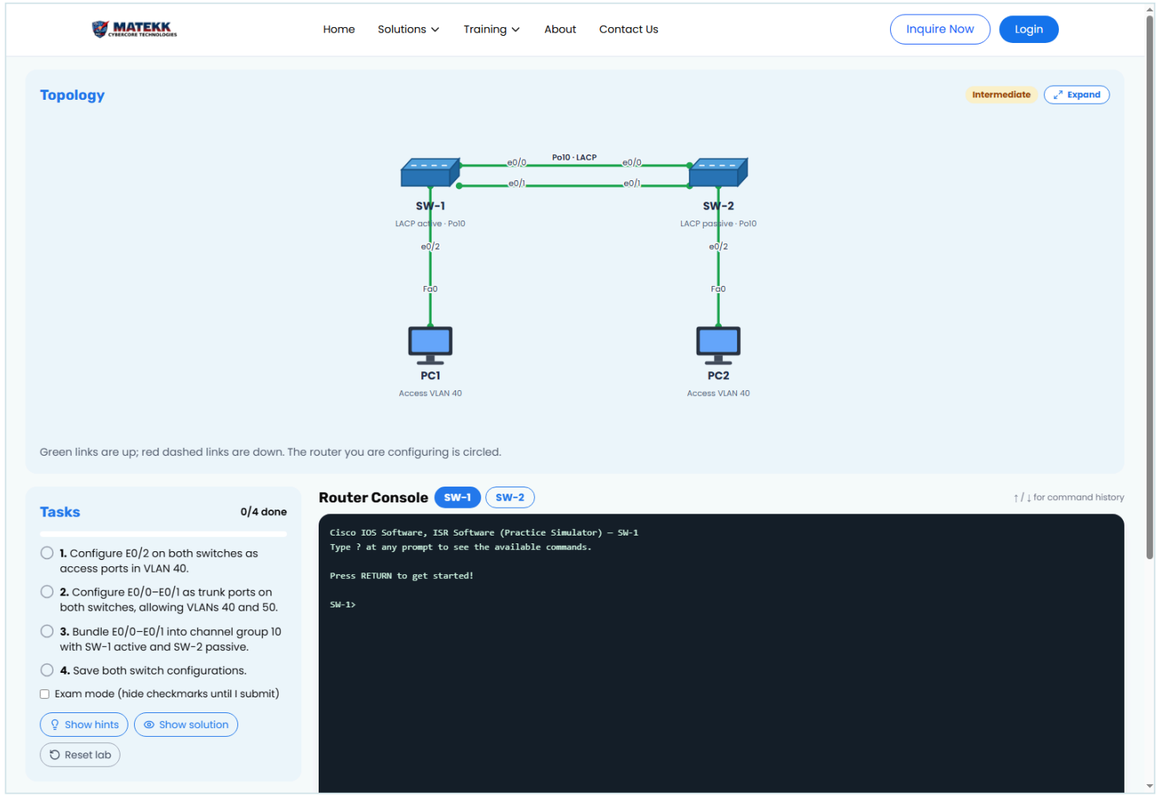

## AFTER | LAB COMPLETED ON THE SITE

Completed topology, terminal work, and green task checks

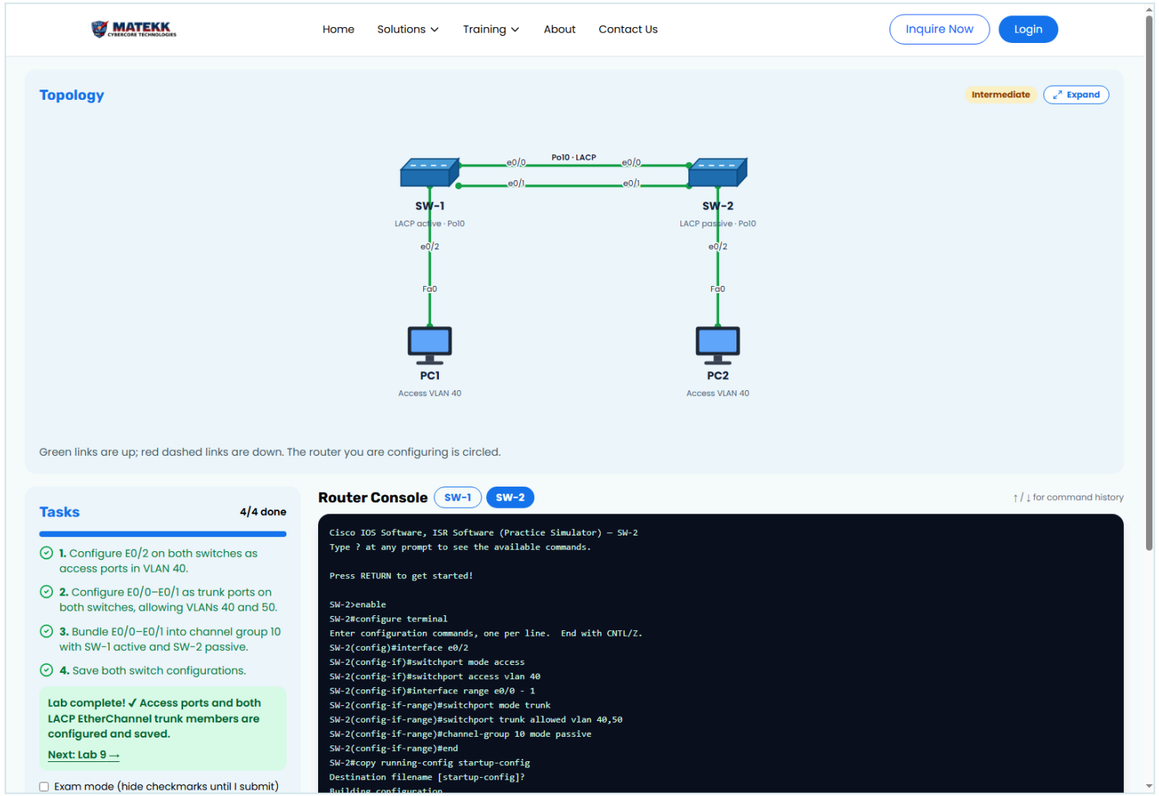

# Lab 8 | Access Ports and LACP Trunk EtherChannel

## BEFORE | LAB NOT YET CONFIGURED

Initial topology and 0% task progress

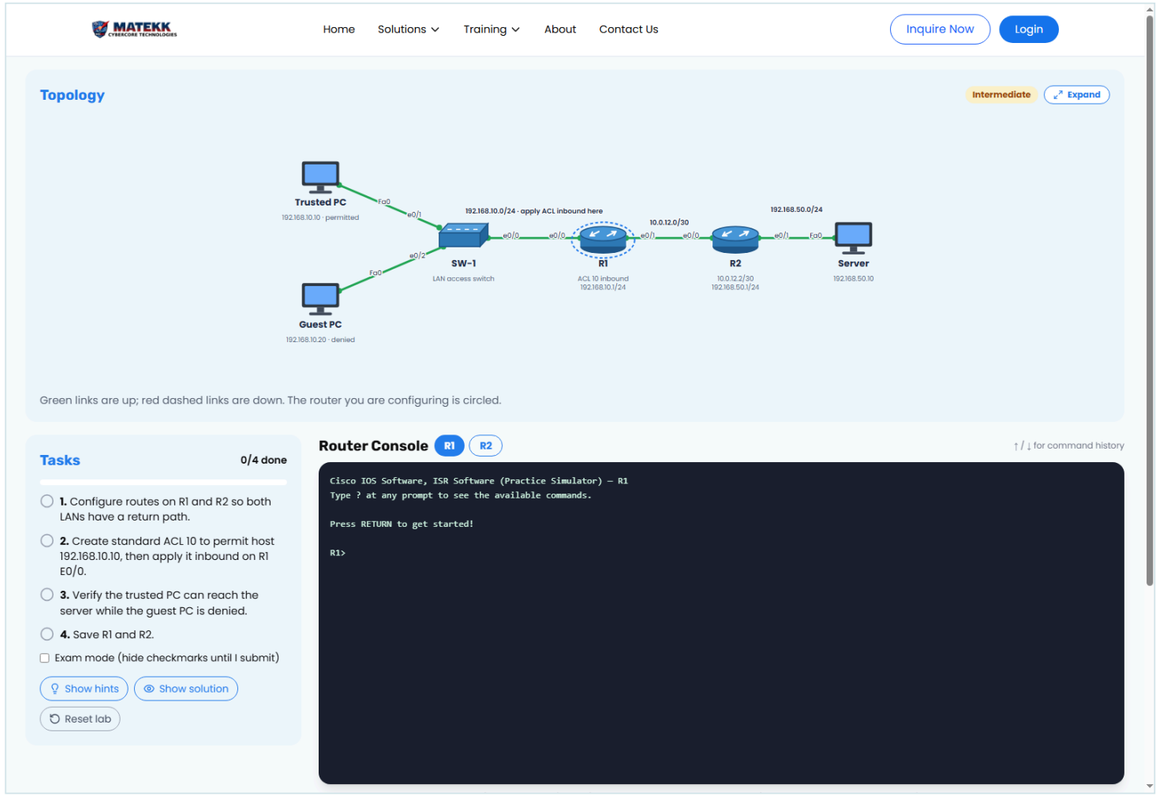

## AFTER | LAB COMPLETED ON THE SITE

Completed topology, terminal work, and green task checks

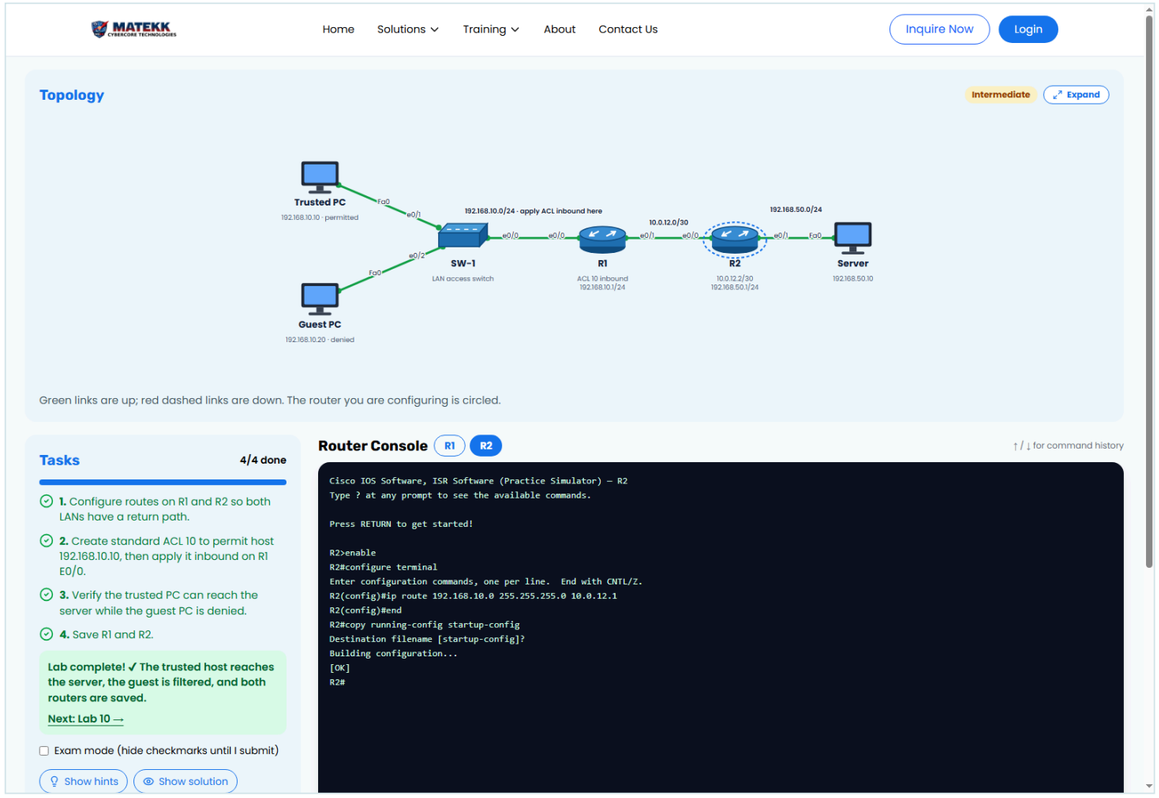

# Lab 9 | Standard ACL: Permit a Trusted Host

## BEFORE | LAB NOT YET CONFIGURED

Initial topology and 0% task progress

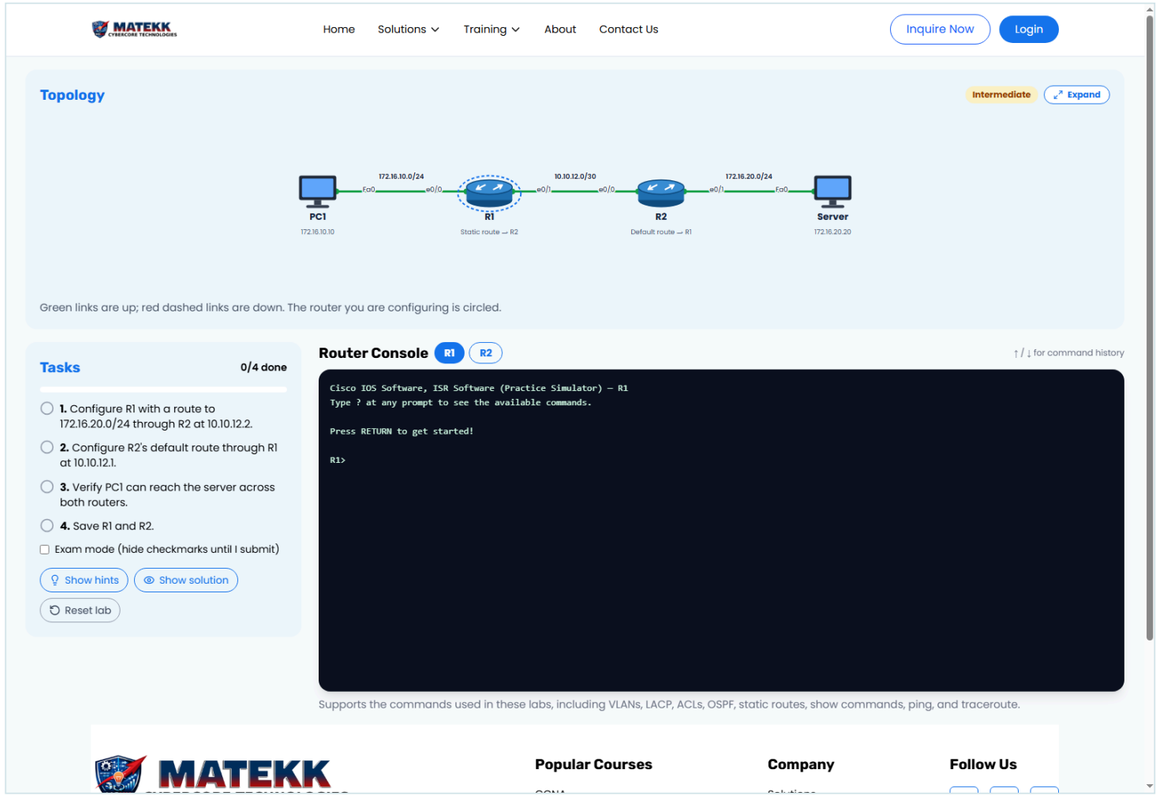

## AFTER | LAB COMPLETED ON THE SITE

Completed topology, terminal work, and green task checks

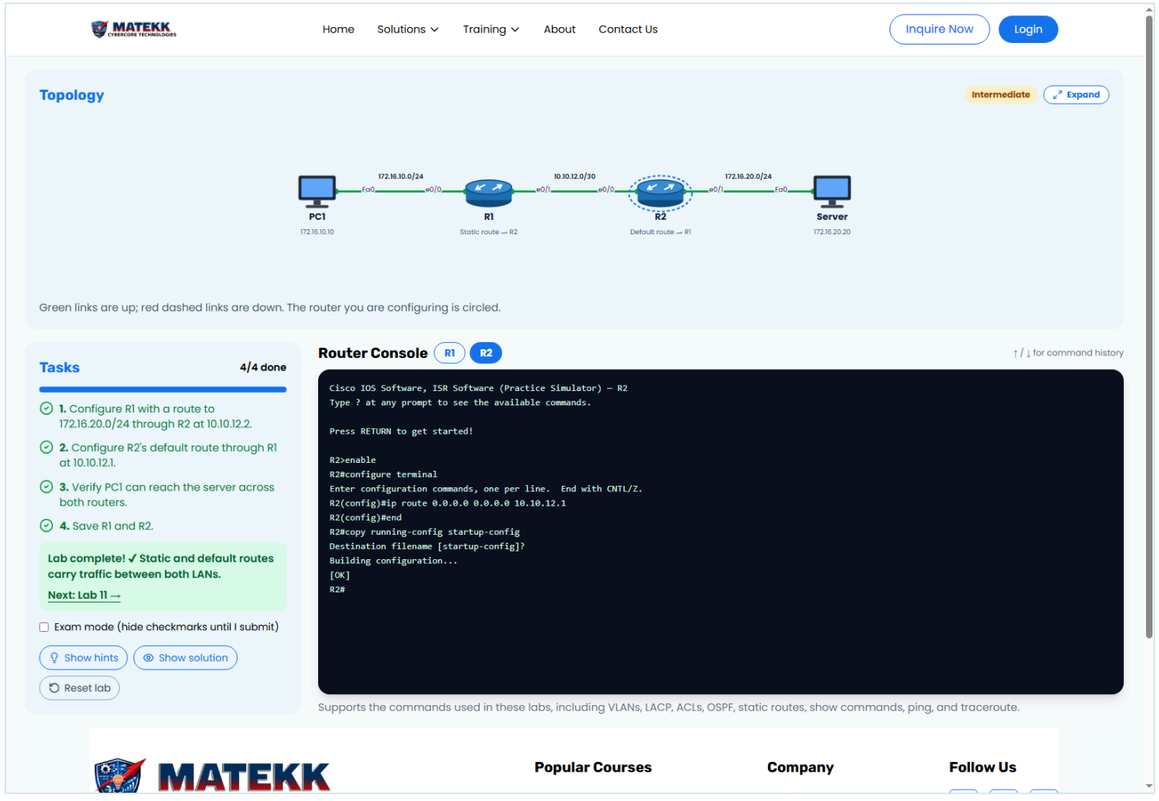

# Lab 10 | Static and Default Route Forwarding

## BEFORE | LAB NOT YET CONFIGURED

Initial topology and 0% task progress

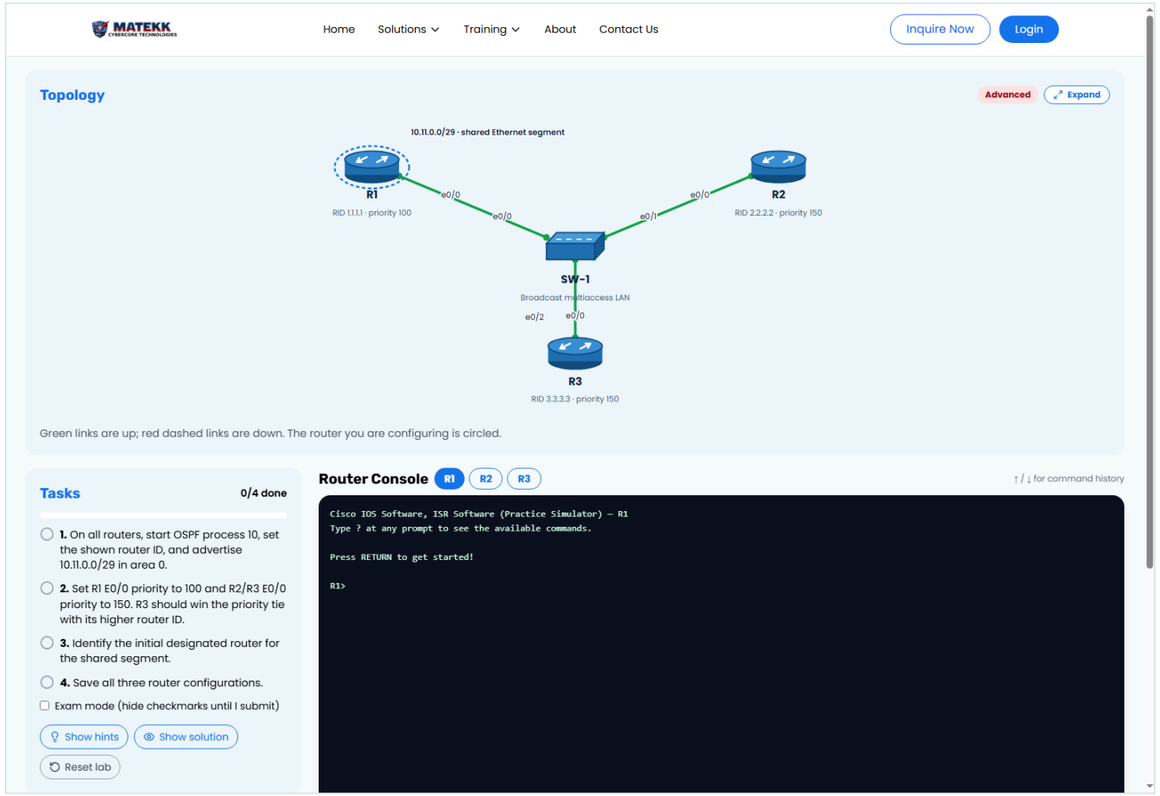

## AFTER | LAB COMPLETED ON THE SITE

Completed topology, terminal work, and green task checks

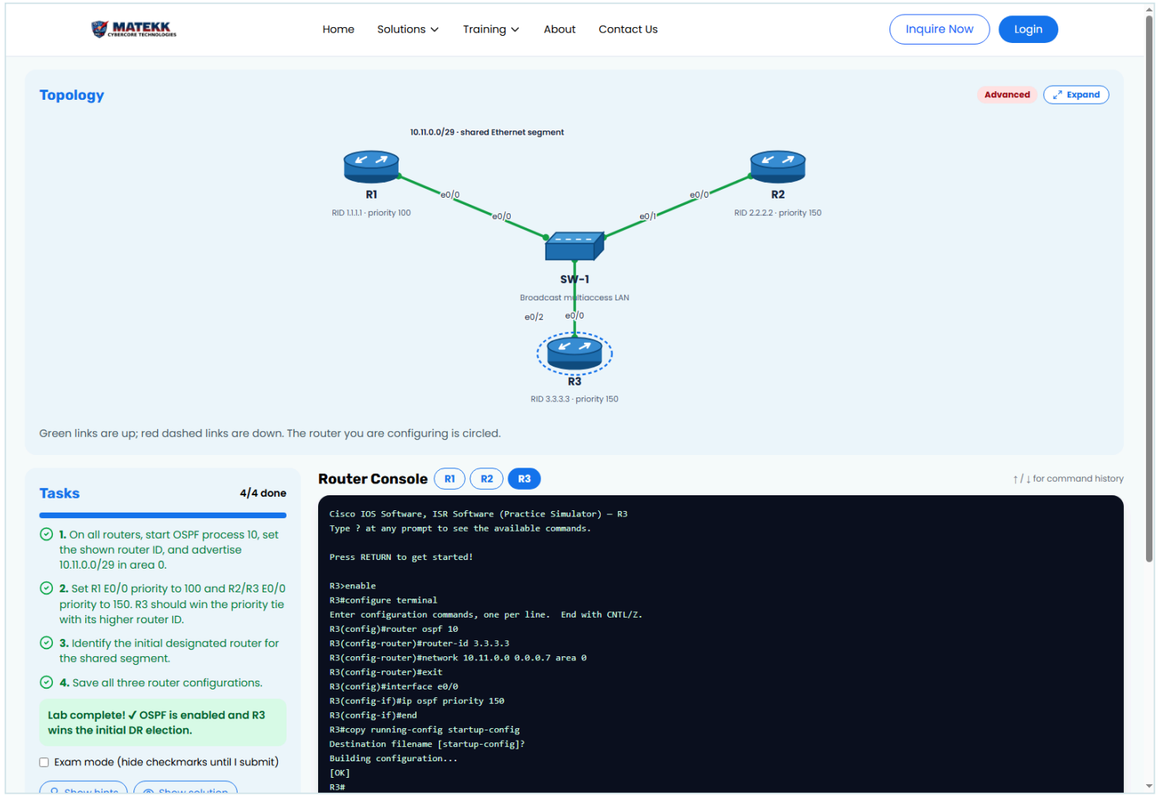

# Lab 11 | OSPF DR Election on a Broadcast LAN

## BEFORE | LAB NOT YET CONFIGURED

Initial topology and 0% task progress

## AFTER | LAB COMPLETED ON THE SITE

Completed topology, terminal work, and green task checks
