Project Proposal for Friday, November 13, 2026

Practice-lab workflows, CCNA exhibit fixes, and topology improvements

For review —

PROPOSAL SUMMARY

Three focused updates improve clarity across CCNA practice labs and exams.

WHAT CHANGED

1. **Practice Lab Improvements**

   Added a guided switch-configuration mode alongside command-console labs.

2. **CCNA "Refer to the exhibit" Fixes**

   Restored missing visuals in questions that depend on network exhibits.

3. **Topology Fixes Across Online Exams and Practice Labs**

   Improved link spacing, endpoint placement, and diagram scaling.

VISUAL COMPARISON · PRACTICE LAB

Before

Before update - practice-lab page

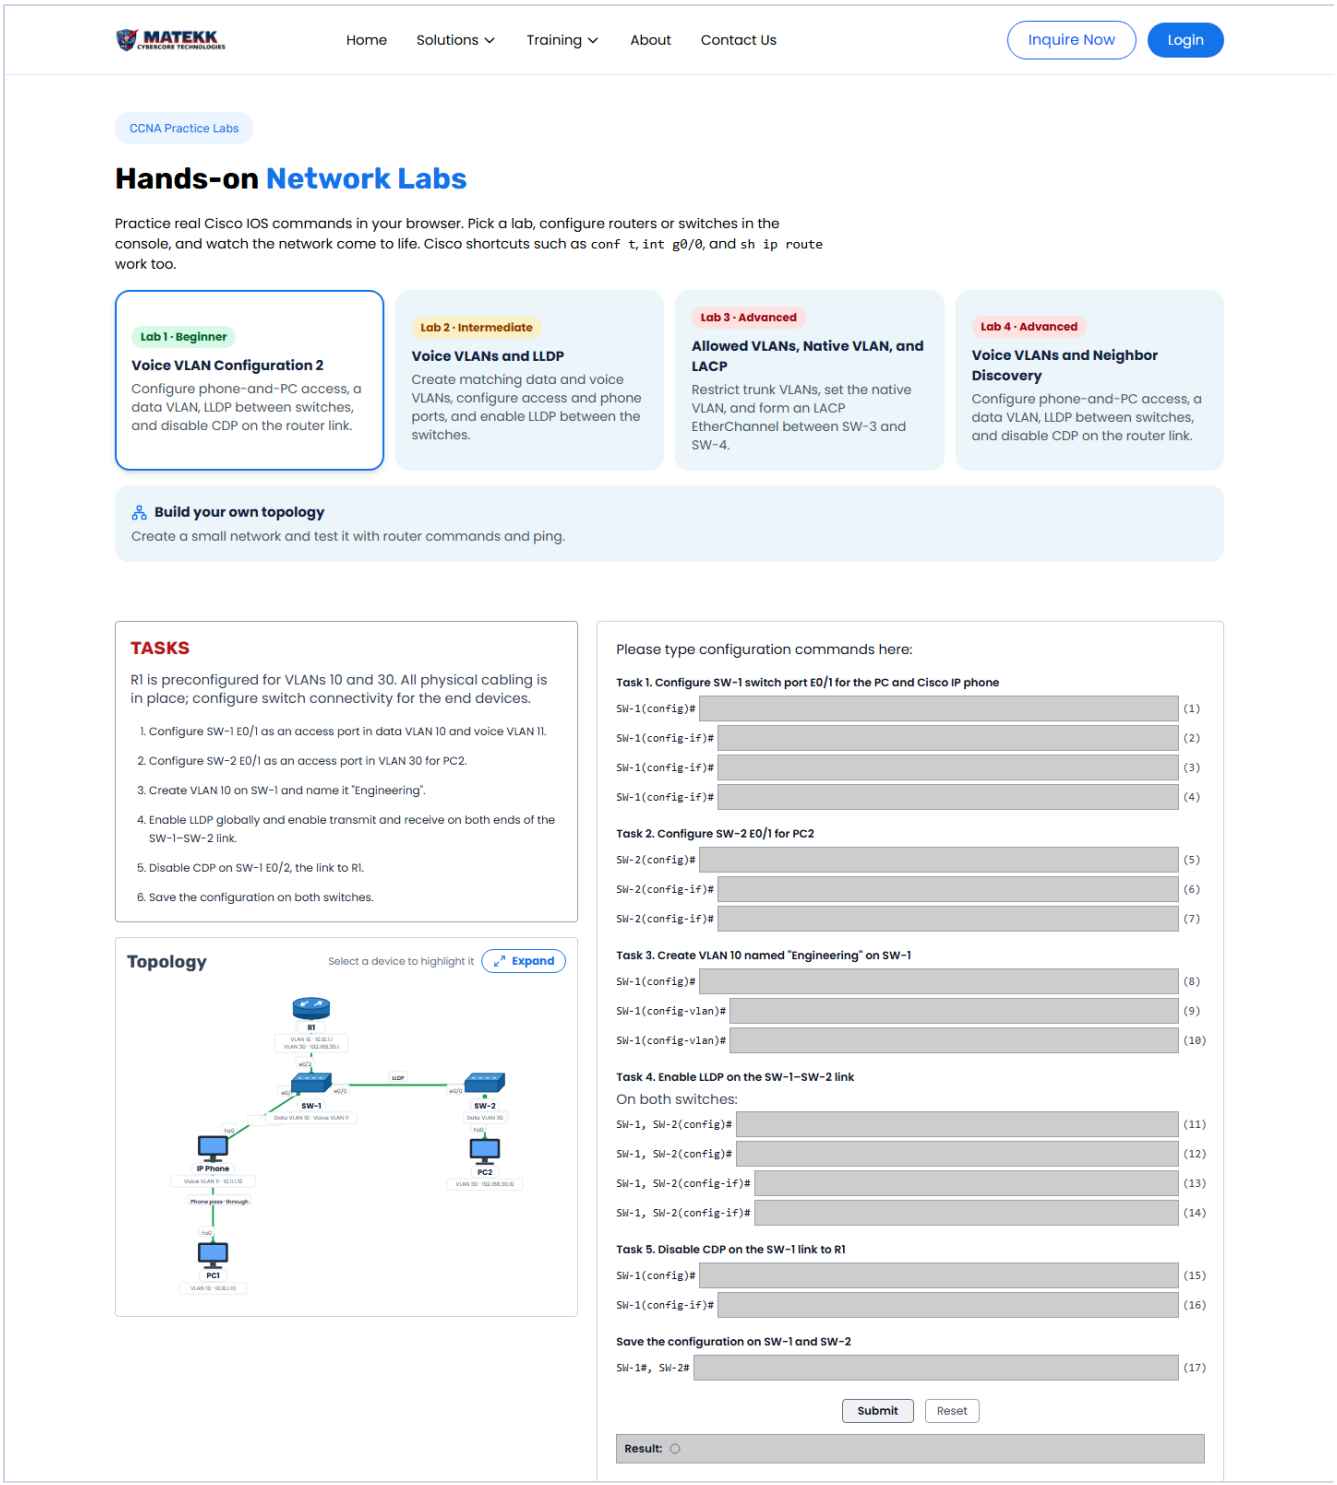

HIGHLIGHTS

- Four selectable labs pair a topology with a task checklist.
- The selected router lab uses a command-console workflow.

VISUAL COMPARISON · PRACTICE LAB

After

After update - practice-lab page

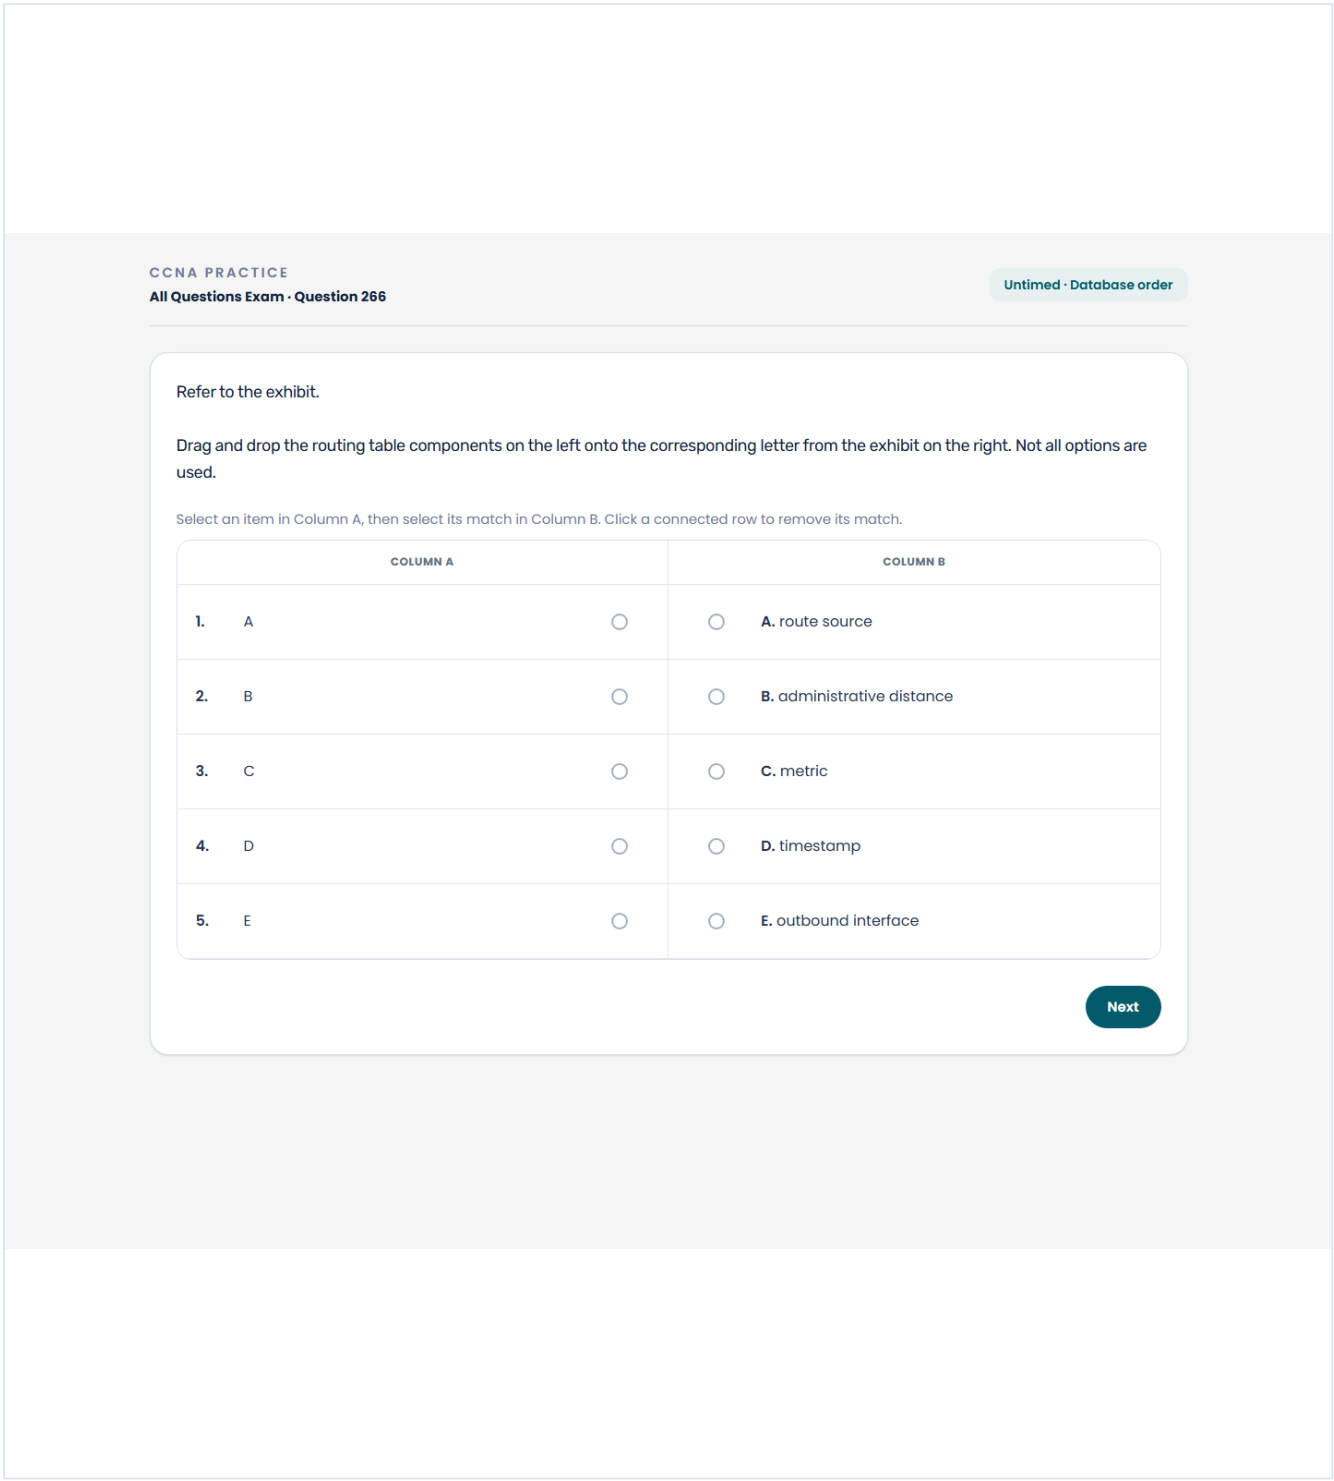

HIGHLIGHTS

- Added worksheet-style mode for switch-configuration labs, with guided tasks and command fields.
- Selecting a lab switches between worksheet and console-style experiences; available on main.
- Topology scaling and link placement were refined for clearer diagrams.

VISUAL COMPARISON - CCNA EXHIBIT

Before

Before fix - CCNA routing-table question

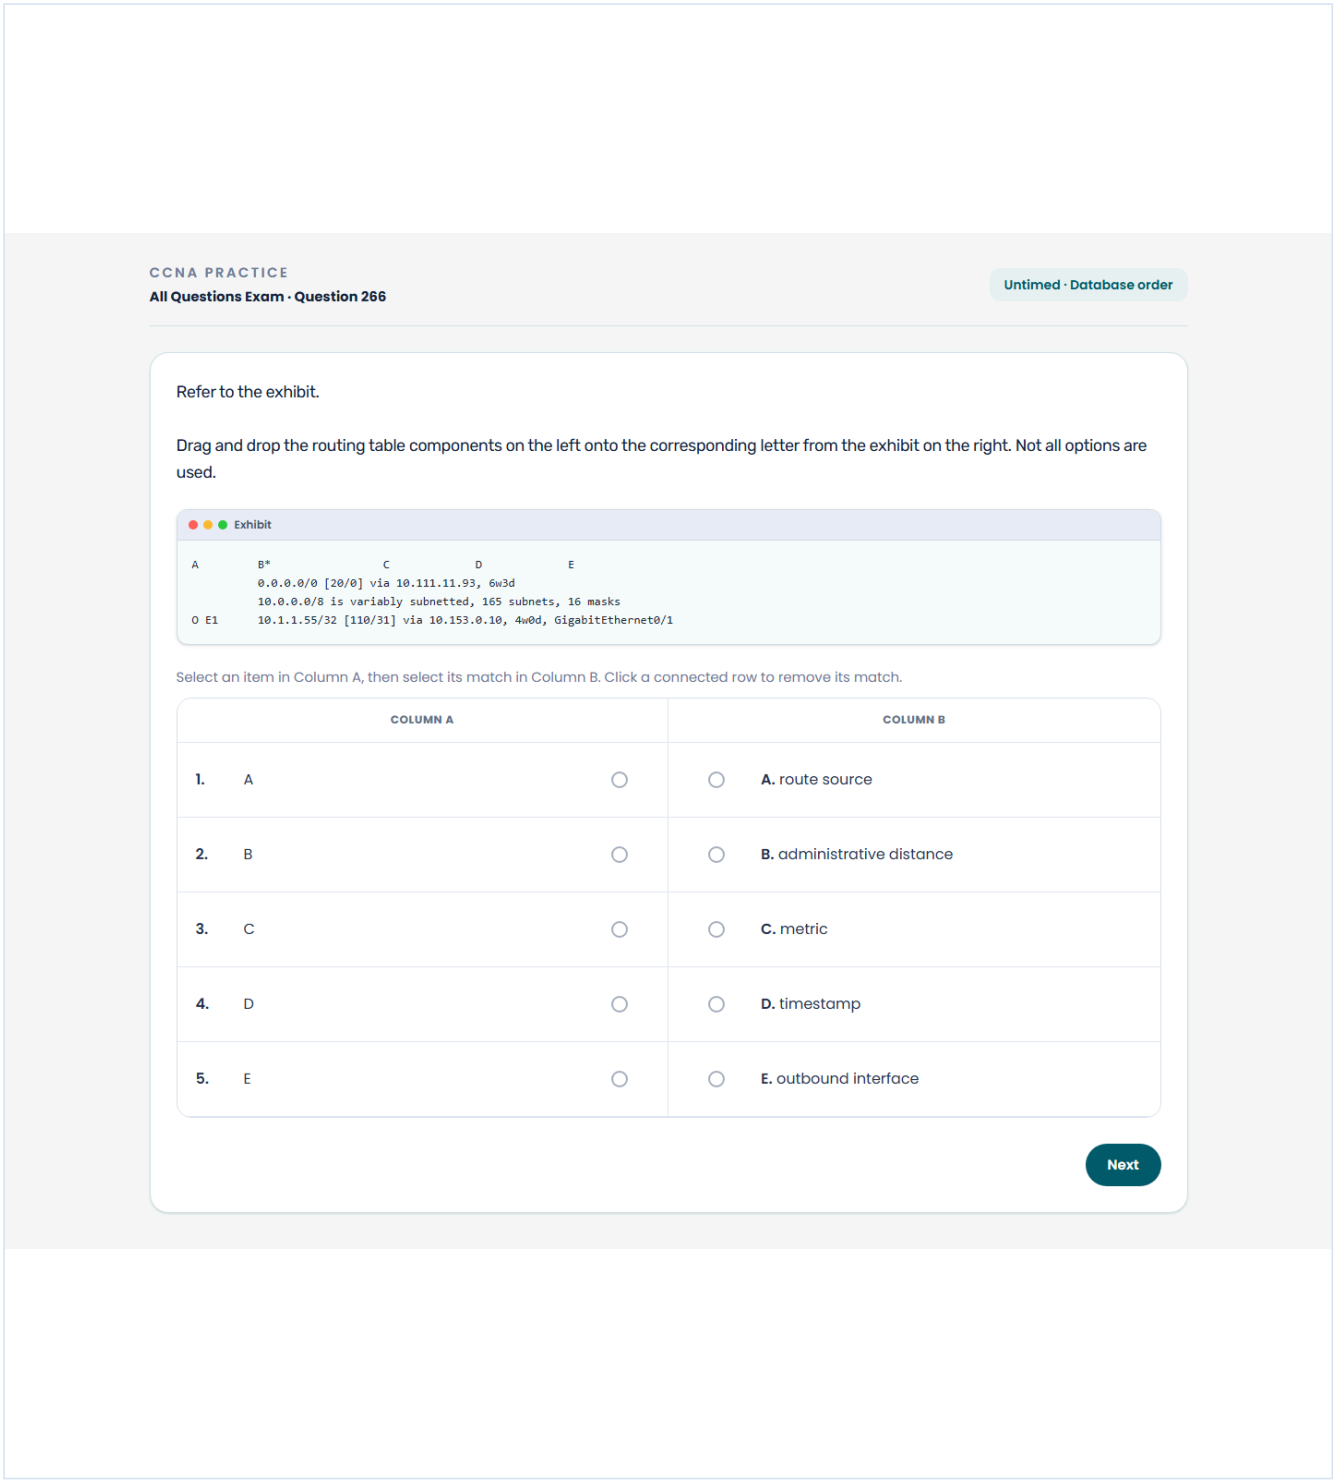

HIGHLIGHTS

- The prompt referred to an exhibit, but no routing output appeared.
- The A-E matching task had no routing-table evidence to work from.

VISUAL COMPARISON - CCNA EXHIBIT

After

After fix - CCNA routing-table question

CCNA PRACTICE

All Questions Exam · Question 266

Untimed · Database order

Refer to the exhibit.

Drag and drop the routing table components on the left onto the corresponding letter from the exhibit on the right. Not all options are used.

Exhibit

```
A          B*                C             D             E
           0.0.0.0/0 [20/0] via 10.111.11.93, 6w3d
           10.0.0.0/8 is variably subnetted, 165 subnets, 16 masks
O E1       10.1.1.55/32 [110/31] via 10.153.0.10, 4w0d, GigabitEthernet0/1
```

Select an item in Column A, then select its match in Column B. Click a connected row to remove its match.

COLUMN A		COLUMN B
1. A	○	○ **A.** route source
2. B	○	○ **B.** administrative distance
3. C	○	○ **C.** metric
4. D	○	○ **D.** timestamp
5. E	○	○ **E.** outbound interface

Next

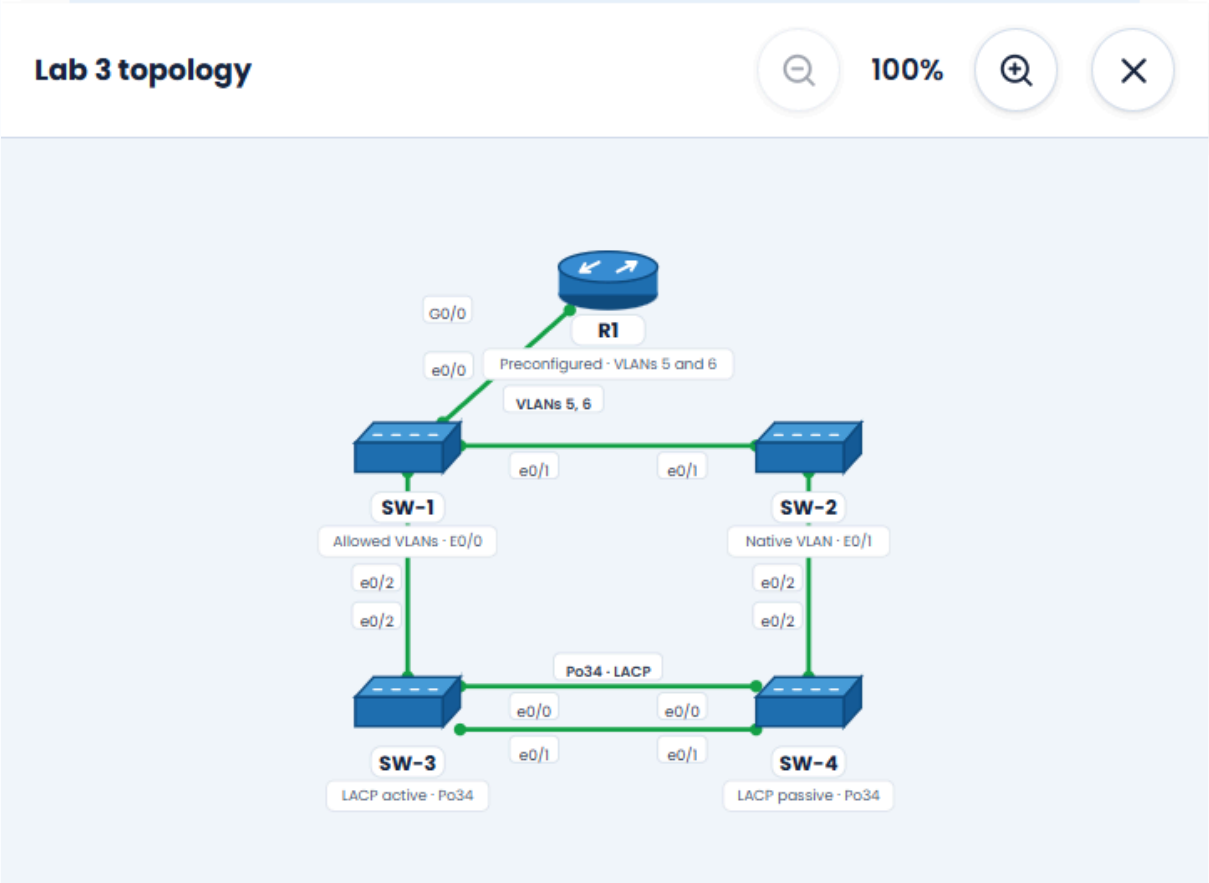

HIGHLIGHTS

- Restored the missing exhibit as a terminal-style routing output.
- Shows the routing-table values and A-E markers in a readable layout.
- Preserves the original interactive matching activity and choices.

TOPOLOGY COMPARISON - CCNA PRACTICE LAB

Before

Earlier Lab 3 topology with boxed interface labels

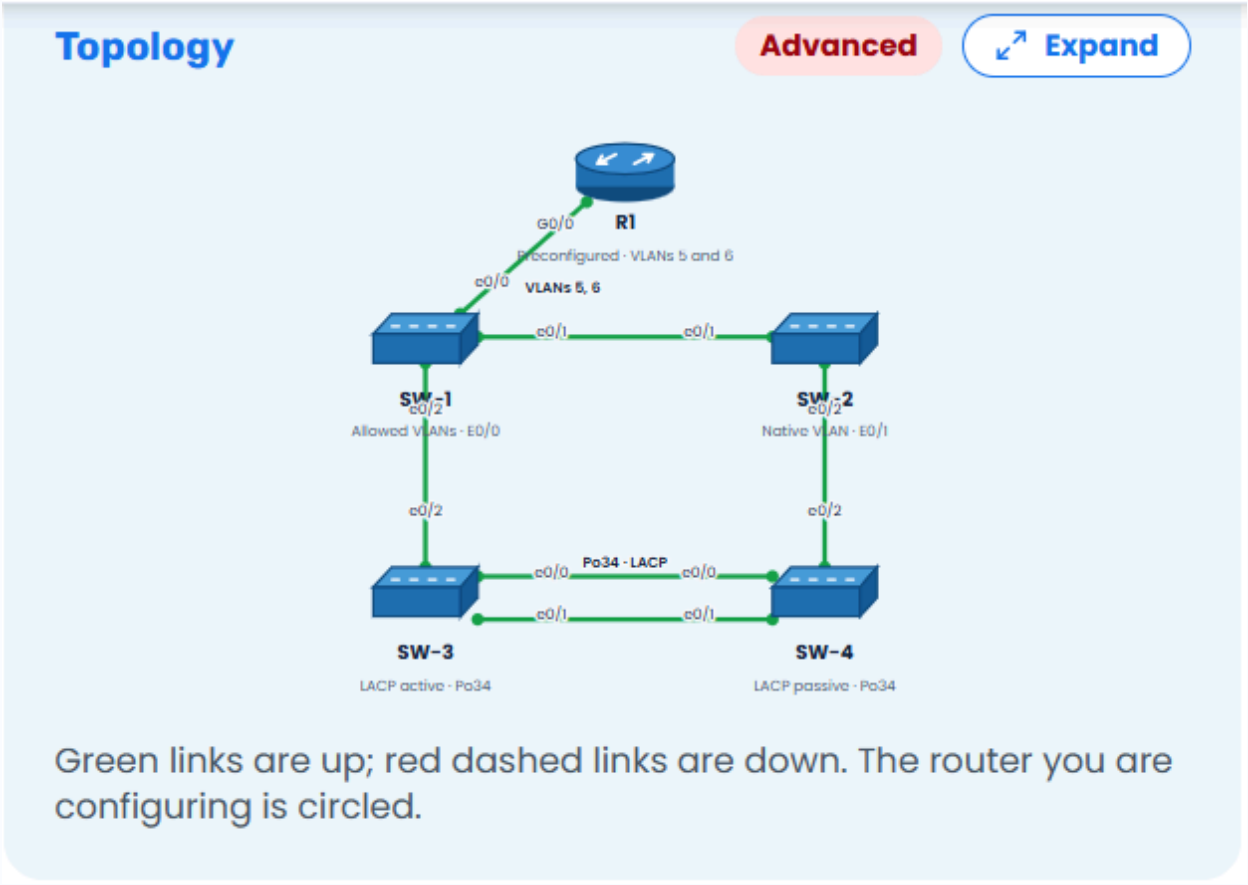

HIGHLIGHTS

- Interface names appeared in white boxes instead of directly on their connecting cables.
- Boxed labels crowded device names and nearby links in the dense topology.

TOPOLOGY COMPARISON - CCNA PRACTICE LAB

After

Updated Lab 3 topology with interface labels on the cables

HIGHLIGHTS

- Removed label backplates; interface names sit directly on their connected wires.
- Render labels after devices so link labels remain visible and descriptions stay nearby.
- Applied the shared presentation to practice labs and CCNA exam topologies.
